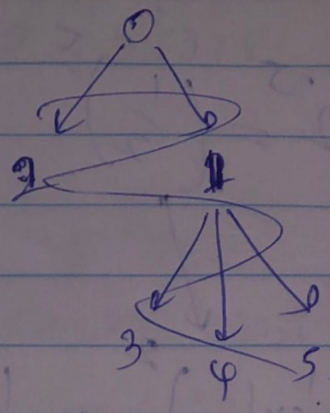
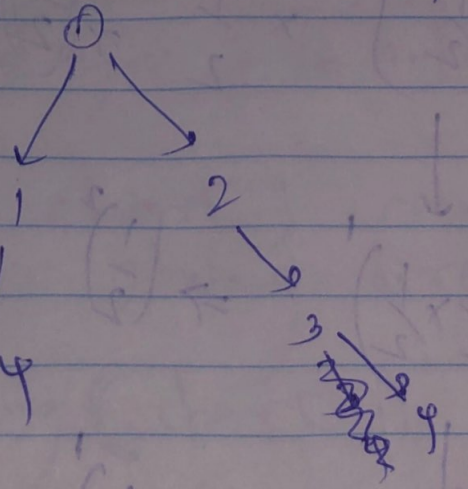
* Jump Game

2 3 1 1 4

4
take this



take a bool array to store already visited nodes.



DP approach

↓

bottom-up if curr > current Max

Scanned with CamScanner

No : _____ Date: __/__/____

- Greedy approach.

2 3 1 1 4

start from end & check a value that can reach / exceed current index.
Ultimately need to reach to the 0th index

If → checking like best possible way

Scanned with CamScanner
