

## \* Optimal Division

1000, 100, 10, 2

↓

1000/100/10/2

sort of with ( )

(1000/100) \* Y

to maximize Y → 10 \* 2

in that case 1000/100/10/2

$$= \frac{1000}{100} \times 10 \times 2$$
