

* Most Stones Removed With Same Row or Column

Can use union find. If row & col are in different graphs, then ~~if~~ they will become 1 graph. Else in the same existing graph.

0 1 2 3 4 5 6 7 8 9 10
 rows cols

like this.

then count nodes which

having vertices in grid & are root.

In each ~~graph~~ connected graph, only 1 will remain at the end.
