

* Set Mismatch

1-n only, element multiple times

(1, 2, 2, 4)

(-1, 2, 2, 4)

(-1, -2, 2, 4)

(-1, -2, 2, 4)

(-1, -2, 2, -4)

repeated

iterate & the place with 10
not having value in array.

XOR method is
hand to
understand.

everything 2 times
xor last bit. Then
xor values set that
bit.

In both variables is
Find value & already
existing
