

* Evaluate Reverse Polish Notation

When operation comes pop the stack & do the calculation & then push to the stack.

No: _____

Date: ____/____/____

- As an alternate we can use array with a pointer to current referring.
- another alternate is we can use a `map<String, Bifunction<Integer, Integer, Integer>>` map.
 arguments return type
then to pass data & retrieve value we can use
`map.get(s).apply(—, —)`
